

VISHNU SONI

sonivishnu495@gmail.com | (+91) 8806 880 770 | Thane, Maharashtra, India

PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years of experience in full-stack development, enterprise applications, system integration, and software delivery across banking, insurance, and education domains. Skilled in gathering requirements from stakeholders, analyzing business needs, and designing scalable technical solutions. Strong expertise in .NET technologies, Angular, RESTful APIs, database design and optimization, performance tuning, and production support. Experienced in Agile SDLC environments, delivering secure, high-performance applications and collaborating with cross-functional teams to improve business efficiency.

PROFESSIONAL EXPERIENCE

APTECH Limited , <i>Assistant Manager / Sr. Software Engineer</i> - Leading end-to-end development and delivery of enterprise applications. - Developing full-stack solutions using C#, ASP.NET Core, ASP.NET MVC, Web API, ADO.NET, Entity Framework, Angular, JavaScript, Redis, Docker, Node.js, VB.NET, and AI-based solutions. - Designing and optimizing databases using SQL Server, MySQL, and MongoDB. - Implementing RESTful APIs and system integrations for enterprise applications. - Migrating legacy .NET applications to .NET Core to improve performance, scalability, and maintainability. - Providing production support, performance tuning, and issue resolution. - Mentoring developers and contributing to system architecture and technical design decisions.	04/2024 – Present Mumbai, India
Clover Infotech Pvt. Ltd. (Deputed to Universal Sampo General Insurance Co. Ltd.) , <i>Full-stack developer</i> - Developed and maintained insurance applications covering policy management, claims processing, and business workflows, handling both frontend and backend development to deliver scalable, secure, and high-performance solutions. - Worked with C#, ASP.NET Core, ASP.NET MVC, Web API, ADO.NET, Entity Framework, Angular, JavaScript, and SQL Server to design, build, and enhance enterprise-grade insurance applications. - Supported system integrations with third-party insurance systems, along with performance optimization, production support, and issue resolution to ensure stable and efficient application operations.	02/2023 – 04/2024 Mumbai, India
Masstech Business Solution Pvt. Ltd. (Deputed to AGS Transact Technologies Ltd.) , <i>Software Engineer</i> - Developed and maintained digital payment and transaction reconciliation systems for banking operations, ensuring secure, accurate, and high-performance financial processing. - Built and enhanced enterprise banking applications using C#, ASP.NET MVC, Web API, ADO.NET, Entity Framework, Angular, JavaScript, PL/SQL, and SQL Server to support business-critical requirements. - Supported system integrations with banking channels and third-party systems, along with production environment support, performance optimization, and issue resolution to ensure reliable application delivery.	10/2020 – 02/2023 Mumbai, India
Maitri Infosoft Pvt. Ltd. , <i>Junior Software Engineer</i> - Worked on ERP, CRM, and web portal development projects as part of service-based project exposure. - Used technologies including C#, ASP.NET MVC, Oracle, JavaScript, and SQL for development and maintenance tasks. - Assisted in developing and supporting web applications by implementing features, fixing issues, and performing basic testing under guidance.	11/2018 – 10/2020 Mumbai, India

EDUCATION

Bachelor of Science (Information Technology) , <i>University of Mumbai</i>	03/2017
Higher Secondary Certificate (HSC) , <i>Mumbai University</i>	02/2014
Secondary School Certificate (SSC) , <i>Mumbai University</i>	03/2012

TECHNICAL SKILLS

Languages & Frameworks: C#, ASP.NET Core, ASP.NET MVC, Web API, ADO.NET, Entity Framework, PL/SQL, SQL, JavaScript, PHP, Node.js, Angular, AngularJS, Windows Forms, VB.NET | **Frontend Technologies::** HTML5, CSS3, Bootstrap, jQuery, Angular, AngularJS | **Databases:** SQL Server, Oracle, MySQL, PostgreSQL, MongoDB | **Caching:** Redis | **Tools & Platforms:** Visual Studio, VS Code, SSMS, IIS, DBeaver, Postman, Swagger | **Version Control:** Git, GitHub, GitLab, Azure DevOps | **Concepts:** Object-Oriented Programming (OOP), RESTful APIs, Microservices, System Integration, Database Design, Performance Optimization, SDLC, Agile Methodology

KEY PROJECTS

SmartMCQ AI, Developer | Technologies: Ollama LLM and ASP.NET MVC

Developed an ASP.NET *Core* MVC application that integrates offline Ollama LLM (Llama 3 / Mistral) to automatically generate multiple-choice questions from user-provided topics or content without internet dependency. Implemented backend logic using C#, ASP.NET *Core* MVC, and Web API concepts to process prompts and generate structured quiz outputs. Designed a user-friendly interface for quiz generation, improving automation and reducing manual question creation effort.

Exam Reporting Portal, Lead Developer | Technologies: C#, Web API, SQL Server, Angular, Node.js

Designed and developed Admin Portal and Dashboard modules for an exam management system, providing analytics, reporting, and performance insights. Built RESTful APIs and backend services to support data processing and dashboard functionality, enabling efficient monitoring, reporting, and decision-making.

Server-to-Server Sync API, Lead Developer | Technologies: ASP.NET Core, Entity Framework, MSSQL, Swagger

Implemented secure server-to-server API integration for transferring large-scale data across 18 tables, including exam paper sets and topic-wise selections. Designed and developed backend services using ASP.NET *Core* Web API and Entity Framework for efficient data access and ORM-based database operations. Enabled VPN-secured communication and optimized data handling to ensure reliable, scalable, and high-performance cross-server synchronization.

Reconciliation Application | Clients: ICICI Bank, Union Bank of India (UBI), CBS, Indian Bank,

Lead Developer | Technologies: C#, PL/SQL, JavaScript, SQL Server

Built a transaction reconciliation system integrating multiple banking channels (NFS, Switch, EJ, CBS/GL) and payment networks (RuPay, Visa, Mastercard, IMPS, UPI, NEFT, RTGS). Developed backend services using C#, ASP.NET *Core* MVC/Web API, ADO.NET *Entity Framework*, and SQL Server. Implemented automated reconciliation, reporting, and dispute management to improve accuracy, reduce manual effort, and support high-volume banking operations.

Windows-Based Exam Application, Lead Developer | Technologies: C#, SQL Server, ADO.NET

Developed a secure desktop application with MAC/IP binding, user authentication, and role-based access control to prevent unauthorized access. Implemented security features such as system lockdown during exam mode, session monitoring, and integrity checks to ensure a controlled and tamper-resistant environment. Enhanced application security to prevent misuse and ensure fair usage during assessments.

Typing Test, Developer | Technologies: C#, ASP.NET, SQL Server

Developed and maintained a centralized exam management system supporting typing tests, HO operations, ATC modules, reporting dashboards, and real-time tracking for efficient exam administration and monitoring. Migrated application from ASP.NET *Core* to ASP.NET *Core* to improve performance, scalability, and maintainability.

Database & File Backup Automation Tool, Lead Developer | Technologies: C#, SQL Server, Asp.net

Developed an internal automation tool for scheduled database and file backups, enabling secure data transfer between servers with integrated encryption and decryption capabilities.

CC automation, Developer | Technologies: C#, SQL Server, Asp.net

Engineered a centralized server-based automated exam paper generation system with secure workflows, enabling synchronization of candidate data, dynamic paper generation, password set, and database mirroring for controlled exam delivery across centers.

Gamechanger HO Exam Configuration Portal, Lead Developer | Technologies: C#, SQL Server, MVC

Configured and managed the complete exam lifecycle on the Gamechanger HO platform, including exam setup, client onboarding, candidate data upload, question paper locking/unlocking, and PIN-based access control. Ensured secure and controlled exam execution through proper workflow configuration and access management.

Universal Sampo Website, Full-Stack Developer | Technologies: C#, Angular, ASP.NET core, SQL Server

Developed frontend and backend modules for insurance products including vehicle, health, and burglary insurance. Implemented features for policy management, claims processing, and renewals. Integrated payment gateway services and enabled synchronization with Genisys system to support seamless insurance operations and data exchange.

Card Payment with MPOS (RCBC Bank), Developer | Technologies: C#, PL/SQL, JavaScript, SQL Server

Developed a robust payment solution to enable card-based transactions through MPOS devices at merchant locations. Implemented reporting, transaction history, and audit trails.

Lanka-Pay Portal, Developer | Technologies: C#, PL/SQL, JavaScript, SQL Server

Designed and developed a merchant and customer payment portal enabling merchant registration, transaction tracking, profile management, and receipt generation. Ensured secure payment processing, compliance with transaction standards, and improved user experience for efficient financial operations.

Hotel Booking & Inventory Management, Developer | Technologies: Asp.Net, C#, MSSQL

Developed and integrated a restaurant billing system with thermal printer support, enabling fast, accurate, and efficient bill generation and printing operations.

ERP, CRM, Website Development, Developer | Technologies: Asp.Net, C#, MSSQL

Worked on ERP and CRM solutions along with a Travel Expense Management Portal, contributing to development, enhancement, and maintenance of enterprise business applications.

SAP Project Web Portal, Developer | Technologies: Asp.Net, C#, MSSQL

Optimized SAP licensing by implementing controlled multi-user access under a single license, improving license utilization efficiency and reducing overall licensing costs. Enhanced system usage monitoring and ensured compliance with enterprise licensing policies.
